evertz.io

evertz.io is a scalable cloud-based microservice platform designed to offload segments of your workflow to the cloud without big commitments.

Assist: Risk #!&%

Assist:Risk is a profanity localizer service from the audio track, to identify exact time codes visually in Mediator-X where profanity was detected for time of day and regional compliance.

Using our default language file or a custom text profanity file, we will auto-detect any words that appear in the audio track that are on the list and inform your operator via the Mediator-X Interface.
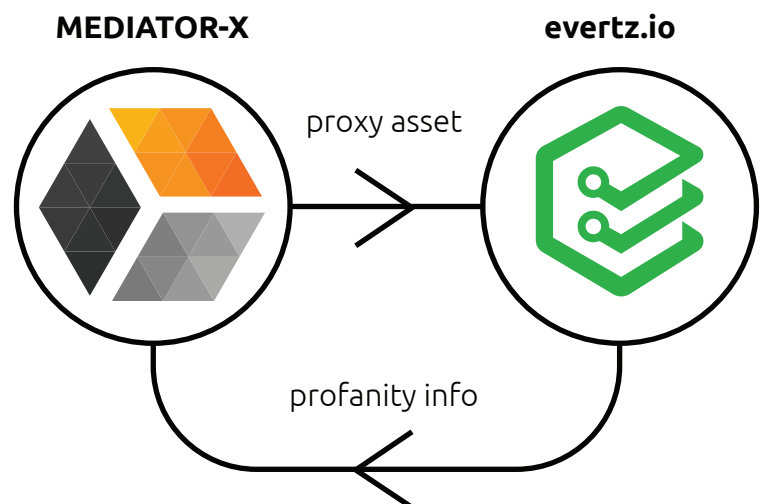

FEATURES & BENEFITS

- Easily iterate through detected profanity points using Mediator-X interface.

- Quickly locate all the time codes where there is a profanity match.

- Request profanity information from evertz.io from a proxy version of an asset (MPEG4 or DASH), saving you time and bandwidth.

- Easily match based on any number of custom dictionaries managed in Mediator-X.

- Documented API available, so you can customize scripts as part of your own applications.

- Inherently scalable for peaks.
