

evertz.io is a scalable cloud-based microservice platform designed to offload segments of your workflow to the cloud without big commitments.

Assist: Scene

FEATURES & BENEFITS

- Easily iterate through suggested scene split points using Mediator-X interface.
- Quickly locate all the time codes where there are opportunities to insert a break.
- Request scene information from evertz.io from a proxy version of an asset (MPEG4 or DASH), saving time and bandwidth.
- Inherently scalable for peaks.

ORDERING INFORMATION

Contact your preferred Evertz Associate for more details.

Assist:Scene is a service that allows users to automatically determine what spots in an asset have appropriate scene changes for inserting breaks, ease of searching, etc.
