

evertz.io is a scalable cloud-based microservice platform designed to offload segments of your workflow to the cloud without big commitments.

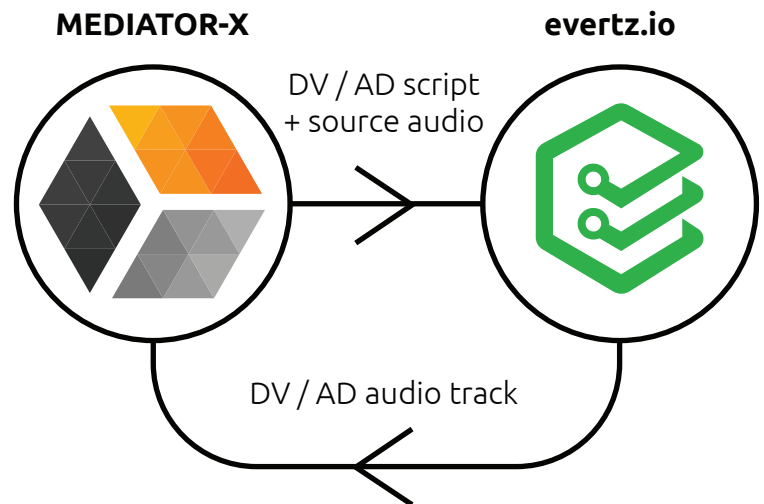

Broadcast: SmartDV))

FEATURES & BENEFITS

- Generate a broadcast-ready described video audio track from scripts.
- Use Mediator-X to manage your distributed DV work.
- Request embedding of the confirmed audio file into your mezzanine format asset.
- Generate professional DV audio.
- Use Mediator-X & evertz.io to allow third party work distribution.
- Use evertz.io to pre-populate blank DV scripts with time-code information for suggested DV opportunities.

Broadcast:SmartDV automatically creates a broadcast-ready described audio track from your described video (DV) script. Eliminate the need for voice actors by using a selection of voices to produce human indistinguishable quality tracks. SmartDV is specifically designed to simplify distributed authoring using outside described video script writing services.
